

BIOBESTicide

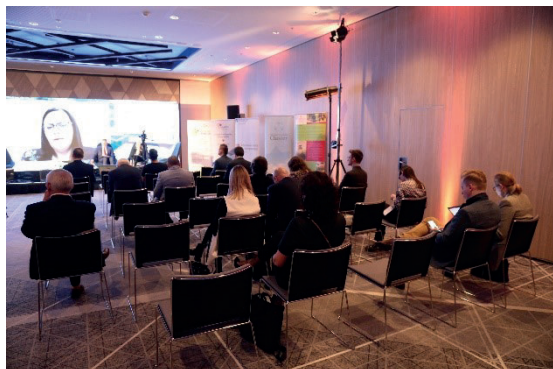

BIO-Based pESTicides
production for sustainable agriculture

UPDATES ON PARTNERS PARTICIPATION IN NATIONAL AND INTERNATIONAL EVENTS

The BIOBESTicide project continues! Technical results are being successfully achieved across all work packages and the consortium is taking every opportunity to present the progresses in national and international events to attract stakeholders and inform them about the effective and cost-efficient biopesticide that the project is developing.

In this newsletter we are proud to present some of the most interesting conferences, workshops, fairs and forum attended by the BIOBESTicide partners with the aim of boosting the dissemination of the project results, increasing its impacts and visibility towards a wide audience!

6th Congress of Polish Clusters

Zielona Chemia (WPCC) was one of the organizers of the 6th Congress of Polish Clusters, which focused on the role of clusters in supporting the regional development policy created at the level of the European Union, Poland and Polish self-government regions. The event, held on November 9 and 10, 2022, highlighted the European, national and regional economic development policies and the possibilities of supporting the competitiveness of companies, and thus the

regions in which they operate, with the help of available, huge new EU funds. In this framework, WPCC hosted the panel “Green economy ecosystem” which featured dissemination of WPCC’s EU projects including BIOBESTicide.

IFIB 2020 - International Forum on Industrial Biotechnology and Bioeconomy

BIOBESTicide participated in the International Forum on Industrial Biotechnology and Bioeconomy, which took place in Rome, from 1st to 2nd October 2020. The event represented the perfect opportunity to find potential partners for collaborations, business development, licensing agreements, joint ventures, research projects, exchange of experiences and partnership opportunities. BIOBESTicide was displayed during the online poster session scheduled within the event

agenda, and its objectives and aims were presented to key actors of the European bio-based sector.

Ecomondo 2021

BIOBESTicide joined **Ecomondo 2021**, the benchmark event in Europe for technological and industrial innovation in the field of green and circular economy, which took place in Rimini (Italy) from 26th to 29th October 2021. Stakeholders and key actors of the Agri-Food and Bioeconomy fields have had the chance to discover the project aims and objectives in the **CiaoTech – PNO Group** booth. BIOBESTicide latest results and progresses were also displayed in the frame of the online poster session of the ‘European targets of climate neutrality: policies and resources for a competitive and sustainable agrifood supply chain’ conference, held on October 26th.

IFIB 2021

BIOBESTicide was presented in the frame of **IFIB 2021**, the International Forum of Industrial Biotechnology and Bioeconomy, held in Trento (Italy) from September 30th to October 1st. The project was showcased during the online poster session of the event and its results and progresses were highlighted in front of Universities, R&D companies, service and consulting agencies, biotech industry, and bio-based research projects and key players of the European bio-based sector.

Biopesticides Europe 2022

BIOBESTicide joined the **Biopesticides Europe 2022** summit, a two day event that gathered key industry stakeholders, researchers and representatives from regulatory bodies to discuss current challenges and future opportunities within the biopesticide industry. The conference also provided insights and updates on market growth along with significant advances in technologies and R&D projects.

In this scenario, Manuela Guiducci, Communication Consultant at **CiaoTech – PNO Group** – the partner leader of the Exploitation & Dissemination WP – participated in the summit to present the aim and objectives of BIOBESTicide and the activities carried out up to date towards a more sustainable and healthy agriculture.

Economic Circle of the Szczecin Metropolitan Area

Economic Circle of the Szczecin Metropolitan Area: a meeting of entrepreneurs, local governors and representatives of the world of science presenting common connections and activities as well as creating value chains between these entities, held in April 2022 in Szczecin (Poland). WPCCC presented the activities of the BIOBESTicide project during the speech of the Cluster representative during the plenary debate.

Plant BioProtech 2022

BIOBESTicide joined the **Plant BioProtech 2022 symposium**, held in Reims (France) from 27th to 30th June 2022. This event focused on scientific, technical and political aspects related to the plant bioprotection, and it gathered not only the scientific community, but also the industry sector, in particular firms involved in the development, formulation and distribution of bioproducts (e.g.: elicitors, biocontrol agents, biostimulants), also allowing researchers and industrial experts in biocontrol to meet, discuss and share their latest results, developments and innovations in the field. The coordinator GREENCELL and the project partner INRAE had the chance to present BIOBESTicide in two different sessions: during the **poster** session, held by Séverine Lopez and the oral presentation “BioBesticide, the eco-friendly and sustainable solution for vineyards diseases in Europe” held by Enrique Gonzalez Bautista in the frame of the session “Bottlenecks, Potential & Existing Solutions” held on June 30th.

International Forum on Industrial Biotechnology and Bioeconomy 2022

BIOBESTicide joined the **International Forum on Industrial Biotechnology and Bioeconomy (IFIB)**, which took place in Bari (Italy) on September 29 and 30, 2022. The project was showcased in the poster session organized in the framework of the event, and its results and progresses were highlighted in front of Universities, R&D companies, service and consulting agencies, biotech industry, and bio-based research projects and key players of the European bio-based sector.

Ecomondo 2022

BIOBESTicide participated in **Ecomondo 2022**, the benchmark event in Europe for technological and industrial innovation in the field of green and circular economy, which was held in Rimini (Italy) from 8th to 11th November 2022.

The project was presented by Patrizia Circelli from CiaoTech – PNO Group in the framework of the session “**Waste as Resources: innovative technologies for recycling and recovery**”, on Tuesday, 8th November. The oral presentation highlighted how the work related to Stakeholder and Market analysis performed by the CTECH, the partner responsible of the Exploitation and Dissemination of the project results, will help the market positioning of the effective and cost efficient biopesticide developed within the project.

In addition, BIOBESTicide was also displayed in the [CiaoTech – PNO Group](#) hub of projects.

SAVE THE DATE!

Training for Farmers

Are you curious to unravel the features and benefits of a new biopesticide for grapevine treatment?

Join us on our **Training for Farmers** to be held online next December 5th, 2022, from 11 to 12 (CET), to discover more about the biopesticide that the BIOBESTicide project is developing!

Our project coordinator Enrique Gonzalez Bautista from Grencell will guide us through the achievements towards BIOBESTicide goal and what to expect from the innovative project biopesticide.

Register your participation at the following [link](#)!
